

Protecting Your Plant

Instant Shutdown **Before** Things Start To Go Wrong

Rotech Motion Sensors can be used whenever information or monitoring of shaft rotation, position, direction, speed, slip etc, is required, for indication, control, interlocking, protection, Sequencing, alarm initiation, and many more functions.

Wherever materials are transported or processed by Conveyors, Elevators, Screws, Crushers, Mixers, Etc, there are applications for Rotech Motion Sensors

Simply Choose

ROTECH FOR RELIABILITY!
