

## S26 – Toolbox Talk Site Hazard Plans

The following items are included on site hazard plans for your information. You must make yourself aware of the content of the plans, and use this information when working on-site:

- The manager's areas of authority
- Any other relevant areas of authority
- The location of all major items of fixed plant identifying the locations of control rooms, switch rooms, main isolator locations, etc
- The location of all first aid points
- The location of all fire points
- The location of +80dB(A) and +85dB(A) noise areas
- The location of all overhead cables with a potential above earth of 150V or greater
- The location of underground cables with a potential to earth of 200V or greater
- The location of all bulk tanks and cylinder storage points
- The position of all working quarry faces
- All traffic flows, one way systems, etc
- Areas where dust masks and eye protection must be worn at all times
- Location of solid and liquid tips (showing active or closed, non-classified or classified)
- Location of the explosives store
- The blasting danger zone(s)
- Explosive transportation routes.
