

Industrial Showcase Cape  
Cape Town  
3<sup>rd</sup> – 5<sup>th</sup> July 2013  
Stand P15

Kwazulu-Natal Industrial Technology Exhibition  
Durban  
23<sup>rd</sup> – 26<sup>th</sup> July 2013  
Stand E2

Rotech Systems UK are again pleased to join forces with our South African agents at two of the forthcoming premier industrial exhibitions to be held in Cape Town & Durban. Recognised as Africa's showcases for all industrial sectors they will be a one-stop exhibition for everything our customers require to monitor their plant/equipment.

Both of these follow on from the highly successful Electra Mining Trade Exhibition held in Johannesburg last year.

The exhibitions are a showcase for all industrial products, supplies & services offering an ideal platform for trade discussions between Rotech Systems and our customers.

The stand will be displaying the latest in our extensive product range of Rotation Monitoring Solutions for every conceivable industry where both plant and equipment need to be monitored for Speed, Direction, Safety, Interlocking etc.

Also featured will be a variety of **'LIVE'** operating product examples utilising a selection of our products demonstrated on a working conveyor belt unit!

Our trade stand will have expert staff on hand to offer any assistance and valuable product selection, application information together with 'Hands on' technical advice & demonstrations to all show visitors.

We look forward to welcoming all visitors to the exhibitions; where in addition to our expert advice, you'll also receive an official pack of complimentary Rotech Systems mints – why accept anything less?

We'll see you all there!
