## Maintenance Engineer – Rye, East Sussex

Full-time

### Job summary:

With over 150 years' experience, The Long Rake Spar Company Ltd is a supplier of quality specialised decorative aggregates sourced from all over the world, and we have an exciting opportunity for skilled and dedicated Maintenance Engineer to join our team in a dynamic manufacturing facility at Rye, East Sussex.

The ideal candidate will possess a strong mechanical knowledge and experience in industrial maintenance, ensuring the optimal performance of our equipment and systems.

### Main duties and responsibilities will include:

- Compliance with safety and regulatory standards during maintenance activities.
- Identify and mitigate risks associated with equipment maintenance, adhering to safe working practices.
- Conduct regular safety audits of equipment, ensuring adherence to company and regulatory safety standards.
- Develop, implement, and maintain a preventive maintenance schedule for all plant equipment to minimise unplanned downtime and extend equipment life.
- Perform root cause analysis of recurring failures and implement corrective actions to prevent future issues.
- Maintain and repair mobile plant machinery, including forklifts, loaders, and other heavy equipment used for material handling within the plant.
- Effective support for new plant installations and equipment upgrades.
